

An Update from _____

**TIER TECH
INTERNATIONAL**

Greetings from Tier Tech International!

As we start the new fiscal year, we wanted to highlight what a year of growth this has been for TTI. After being named as one of America's Fastest Growing Private Companies in 2024 by Inc. 5000, we have continued this growth through 2025 by:

- Expanding our team to support key customers
- Deepening our engagement with the private sector to support new clients
- Evolving and expanding TTI SDA methodologies and tools to better serve our customers
- Investing in our relationships with key partners both new and old
- Being awarded two new prime contract vehicles (OASIS+ SB and SDVOSB as well as SeaPort NxG).

We look forward to next year's opportunities in continuing our mission for clients nationwide. We appreciate our team and partners and are excited for what FY 2026 brings.

Now's the time to adopt integrated approaches that will turn chaos into opportunities for resilience and stronger mission alignment.

Breaking Down Silos

As we kick off a new fiscal year, many organizations are actively reorganizing their teams and navigating new missions and challenges that drive organizational change. It's a great time to address a hidden yet critical barrier to performance--departmental silos.

Our Strategic Design Approaches offer a proven, structured way to align departments, prioritize resources, and drive unified action. In particular, we recommend our [Agile Re-Missioning \(ARM\)](#) workshops, which are purpose-built for change management and for

navigating such changes to an organization's mission, charter, or priorities. ARM assesses where you are today versus where you want to be in the future. From there, ARM prioritizes the decisions, personnel, technologies, activities, and investments required to set your organization on the right path for mission success.

New fiscal years are more than just budgets- they're a chance to rebuild better, together! Learn more at our [recent blog post](#).

Critical Materials Focus

The US faces growing vulnerability in its supply of critical materials, the specialized minerals and rare earth elements essential to defense systems and advanced technologies.

[Critical materials security](#) represents exactly the type of challenge that demands the rigorous, systematic thinking TTI has developed over two decades of supporting high-consequence missions. Our experience supporting national security organizations has taught us that critical materials challenges require the same rigorous, systematic thinking that special operations forces apply to high-consequence scenarios.

We are partnering with organizations to apply our proven methodologies to their most pressing material security challenges. Once we've used our extensive methods to find risks, we then find corollary opportunities.

*We uncover the **right opportunities**, not just the most obvious ones.*

Progressing Toward CMMC Certification

TTI has achieved substantial progress toward Cybersecurity Maturity Model Certification (CMMC) Level 2 compliance and is currently finalizing the implementation of requisite security controls and practices in preparation for formal third-party assessment. We are completing our final compliance milestones and conducting comprehensive internal reviews to ensure all security measures are fully operational and documented.

We maintain a proactive approach to continuously evaluate, refine, and strengthen our cybersecurity framework to align with CMMC Level 2 requirements, NIST SP 800-171 standards, and other applicable federal cybersecurity regulations, which demonstrates our dedication to protecting sensitive customer information, while establishing a robust and compliant security environment that supports our federal contracting capabilities.

Our Contracts

GSA One Acquisition Solution for Integrated Services Plus (OASIS+)

General Services Administration (GSA) Multiple Award Schedule (MAS)

Joint Enterprise Contracted Logistics and Services Support (JE-CLaSS) II

SeaPort Next Generation (SeaPort NxG)

Air Force Strategic Transformation Support (AFSTS) Tier 2

Ready to discuss how our methodologies can help you?
