

An Update from _____

TIER TECH INTERNATIONAL

Greetings from Tier Tech International!

This quarter, we have been focused on building new, and bolstering current, relationships by helping our clients navigate uncertain times and new mission responsibilities. A key component to TTI's support has been the implementation of our [Strategic Design Approaches \(SDA\)](#). We're excited to share two recent success stories below, including the continuous development of our COOP-focused teammates and a spotlight on a member of the TTI team demonstrating how our SDA can unlock innovation and creativity used to tackle everyday challenges in our communities.

We are grateful for our team and all our partners with whom we get to work in solving the nation's most complex problems, and we look forward to our future together.

COOP Training

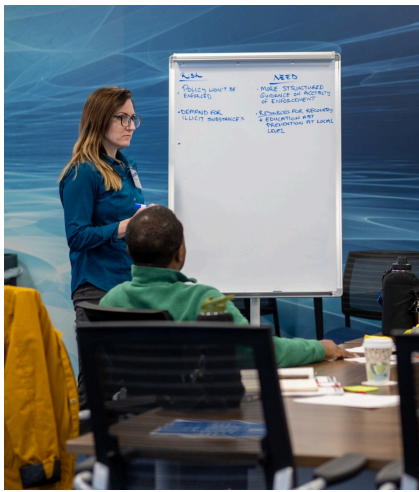

Our Emergency Management Analysts recently participated in FEMA's Continuity of Operations (COOP) training, earning their certification as Level I Professional Continuity Practitioners.

Our analysts are highly skilled in a variety of surveillance and communication platforms, emergency management procedures, Watch Operations, and briefing requirements. Their continued commitment to training is what [allows us to provide full spectrum support](#) to reduce program risk, maintain effective operations, and improve overall COOP capabilities.

**Want to ensure your team is truly
disaster-ready?**

**Let's talk about how
we can help!**

TTI Spotlight

At Tier Tech International, we take pride in the dedication and creativity of our team members. In a recent blog post we were able to spotlight one of those team members, Madelyn, as she has found ways to apply her creativity in ways that progress our national security objectives.

[Click here](#) to read more about Madelyn's experience working here and what she enjoys most about being part of our company culture.
